What You Should Know About

MARIJUANA

DEA PHOTO

FACT: People who began using marijuana before age 18 are 4 to 7 times more likely than adults to develop problem use.

Source: www.drugabuse.gov/publications/drugfacts/marijuana

FACT: Daily use today can have stronger effects on a developing teen brain than it did 10 or 20 years ago. The amount of the main psychoactive ingredient in marijuana, THC, has been increasing steadily over the past few decades. For a new user, this may mean exposure to higher THC levels with a greater chance of a harmful reaction. Higher levels of THC may mean a higher risk for addiction.

DRUGGED DRIVING

WARNING

Acute marijuana use can impair driving by affecting critical thinking and motor skills.

Large number of U.S. high school (HS) seniors and college students put themselves and others at great risks of harm by driving after using illicit drugs or drinking alcohol.
